tips:

The **fedora** gives glamour to even the most mundane look. It's confident and cool, and although its shape is much different than that of the newsboy, some of the same rules apply:

- Just like the newsboy cap, the fedora needs to rest directly on top of the head, or to be pulled down slightly to one side.
- Like the newsboy cap, it works better outside.
- Keep the rest of your look casual. Stay away from suits or you may appear to be in costume.
- Fit is everything. Too small and it will add a few weird inches to the top of your skull, too large and it will swivel on your head like a bowl. Also, be sure to check that the inside is smooth, otherwise you may end up with unsightly and uncomfortable indentations on your forehead.
- If your hair is long, wear it down and let it touch your face. If it's short, make the look less severe with giant gold hoops.
